

# CONNECTION NETWORK OF ACTORS OF SEASONAL AGRICULTURAL LABOUR IN ADANA

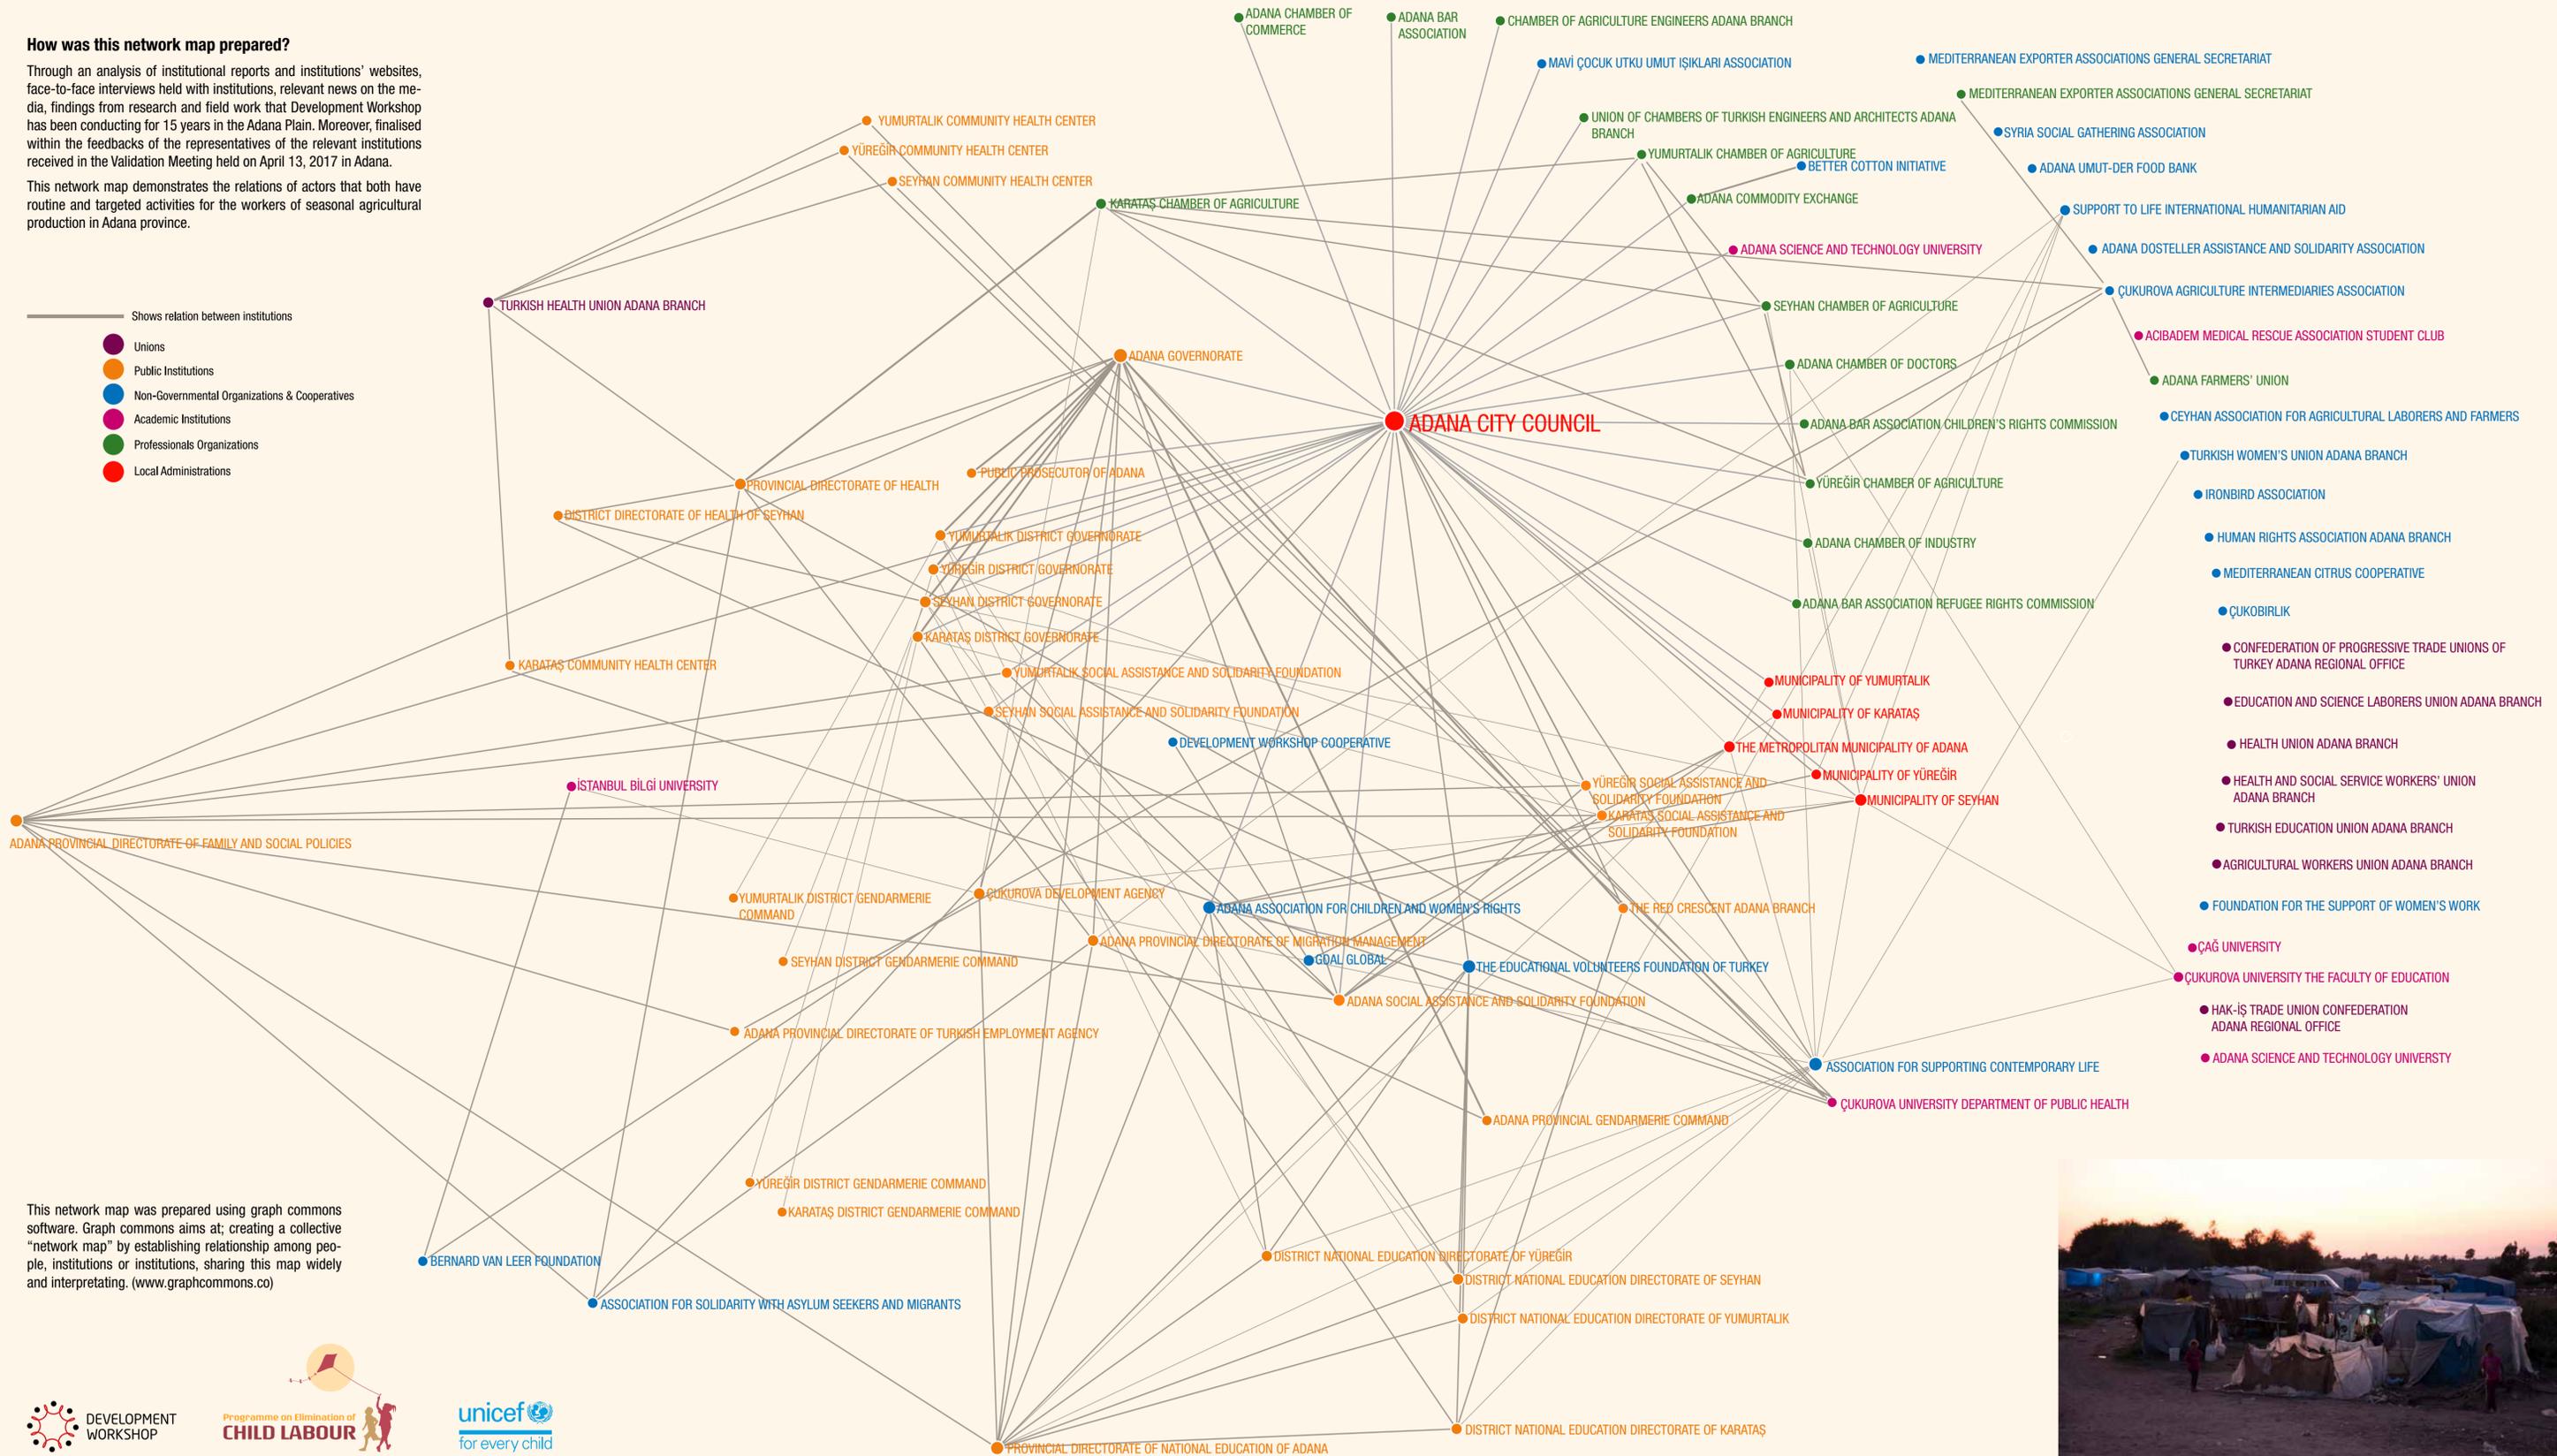

## How was this network map prepared?

Through an analysis of institutional reports and institutions' websites, face-to-face interviews held with institutions, relevant news on the media, findings from research and field work that Development Workshop has been conducting for 15 years in the Adana Plain. Moreover, finalised within the feedbacks of the representatives of the relevant institutions received in the Validation Meeting held on April 13, 2017 in Adana.

This network map demonstrates the relations of actors that both have routine and targeted activities for the workers of seasonal agricultural production in Adana province.

Shows relation between institutions

- Unions
- Public Institutions
- Non-Governmental Organizations & Cooperatives
- Academic Institutions
- Professionals Organizations
- Local Administrations

This network map was prepared using graph commons software. Graph commons aims at creating a collective "network map" by establishing relationship among people, institutions or institutions, sharing this map widely and interpreting. ([www.graphcommons.co](http://www.graphcommons.co))

This study was conducted with financial and technical support of UNICEF.
