HOW WAS THIS NETWORK MAP PREPARED?

Within the scope of five themes (education, health, child protection, living environment, working environment), the institutions and organizations that have roles and responsibilities or that are implementing any activity on elimination of child labor in seasonal agricultural production in the Mersin province were identified. The activities carried out by these institutions, as well as their relation, communication and collaboration with other relevant institutions and organizations were also reviewed. By a desk study, information and documents regarding the program, project, research and/or activities carried out were collected. Then, via correspondence, detailed information about the institution, activities implemented, plans for the future and cooperation with other institutions and organizations was requested. Phone calls were made with some institutions and organizations. This network map shows the routine as well as activity-based relationships between relevant actors of the elimination of child labor in seasonal migratory agricultural production in Mersin.
